

Fira de Barcelona Energy Policy

This policy aims to provide a common framework to implement objectives and actions that continuously strive towards the goal of efficient energy consumption.

The Fira de Barcelona energy policy requires the participation of the company's personnel, with their contribution towards improving the Energy Management System in order to carry out a suitable energy performance.

An effective energy policy is a fundamental part of the business activity and global management of the company itself. The energy policy is reviewed annually by the management of Fira de Barcelona by means of the meetings scheduled for this purpose.

In order to achieve this, Fira de Barcelona has implemented an Energy Management System, in accordance with the UNE-EN_ISO 50001:2018 standards and in observance of the internal requirements established therein. In this sense, Fira de Barcelona undertakes the following commitments:

- Control the use of energy, making a continued effort to identify, determine and minimise the energy impact of our activities and facilities with the purpose of improving our energy performance.
- Comply with current legislation on energy matters, as well as other requirements that our company undertakes.
- Establish and periodically review the objectives and goals in energy management that contributes to our ongoing improvements and empowerment of energy savings.
- Prevent actions that may cause a high energy impact on the activities we carry out.
- Ensure the participation, information, and communication to the personnel of Fira de Barcelona in energy matters, with the aim of achieving the ongoing improvement of our energy efficiency.
- Promote the acquisition and design of energy efficient products and services in order to improve the energy performance of our activity.
- Plan and provide suitable training through the necessary resources that enable the compliance and development of this energy policy.

All the procedures established in the company have the purpose of guaranteeing the right provision of the services requested by our clients, maintaining an ongoing improvement in our energy management.

This policy is distributed to all levels of the company and available to the public, as well as any interested party who so requests it.
