Custom spaces to your most exclusive events

Nuclo Restaurant, was conceived as a gourmet restaurant, bringing together tradition and innovation in each and every one of its dishes in a warm and welcoming setting designed by architect Toyo Ito, winner of the 2013 Pritzker Prize.

It is designed to accommodate groups of up to 200 people for cocktail parties and 150 people for a seated served meal. Its unique facade looks out over a lake next to the fountains of Plaza Europa, over which a walkway crosses to give access to a minimalist space with huge windows that fill the space with natural light. The restaurant has a private room, a reserved area and a terrace.
